# Origin Fertility Care for you

YOU might not be ready to have a baby, but now is the time to plan for the day when you are. Origin Fertility Care, Northern Ireland's only independent fertility clinic, is delighted to be the first clinic in Ireland to routinely offer egg freezing. A woman's fertility is at its highest in her mid-twenties and after the age of 30 there is a steady decline in the number and quality of eggs in the ovaries. Unfortunately, this is a fact of life that we can do nothing about. A woman may want to postpone starting her family until later in life for various reasons: medical, social or economic. Egg freezing offers you a choice. The career woman can freeze her eggs until she feels the time is right; the single woman, until Mr Right comes along. Patients diagnosed with cancer, who need chemotherapy or

Origin Fertility Care will help you to get pregnant when the time is right

radiotherapy, or those facing operations to remove ovaries, can now consider putting their eggs into suspended animation until the time is right to use them. The process is relatively simple, involving hormone treatment to stimulate egg production. The eggs are then collected, frozen in liquid nitrogen and stored safely at the clinic. Egg freezing is not confined to women in their 20s; the service can be availed of by all women

aged 18-38. The eggs can then be stored for up to 10 years, although the storage period can be extended in certain circumstances. Because it is the age of the egg, not the age of the woman, that matters when trying to have a baby, there is really no time like the present. So why wait? Contact the Origin Fertility Care Clinic, 380 Belmont Road, Belfast on 02890 761713 or visit the company website at [www.originfertilitycare.com](http://www.originfertilitycare.com).

## Paradox for your health and well-being

PARADOX is an Omega fish oil that takes the best from the Mediterranean and Arctic diets. It is a unique blend - 100 per cent pure and natural, made using a patented filtration technique that guarantees purity. Oily fish is an important source of omega fatty acids but most people don't eat enough oily fish and Paradox is the simple way to help the body get the omega fatty acids it needs. EPA and DHA are Omega 3 fatty acids which are essential for the maintenance of health. They help protect the heart, nourish the brain, lift mood and help to reduce cholesterol. The fatty acids contained in Paradox also support bone and joint health, may help aches and pains including arthritis and aids growth and development in children. Paradox is the perfect food supplement to ensure your body gets these essential nutrients.

It allows you to achieve the omega benefits of the most maximally pure fish oil for your wellbeing. Formulated to be equal to and better than all other fish oil products. Paradox is a former osteoporosis treatment. After 20 years of treatment, we were not getting from 'p' supplier formulae to produce natural supplier quality. Geoff's considered time in development therapy using their refined fish oil. Paradox

origin FERTILITY CARE
